- Maximum Altitude: 18,000'
- Endurance: Approximately 3 hours
- Bottle Size: 4 CF
- Self Sealing Quick-Disconnect

Oxysaver Cannula

- Standard PB3 Filling Adapter

# PRO2 PLUS FLIGHT BAG PORTABLE

This small, affordable portable oxygen system may fit right inside your flight bag, but don't let its size fool you--This lightweight system provides all the oxygen support you need.

Aimed at pilots who only occasionally go to higher altitudes, but who want the comfort and safety that oxygen systems provide. With up to 3 1/2 hours endurance, the Flightbag Portable™ features a toggle on/off switch, flow indicator for safety, gauge, fill port, and conserving cannula with quick disconnect for safe storage. The Pro2 Plus is easy to use with a fixed-flow, set for 18,000' to support VFR pilots at any altitude. No flow adjustment is necessary.

## AVIATION OXYGEN SYSTEMS

### OXYGEN MADE EASY

qualified to ISO-9001:2015 and AS-9100D and maintains an FAA Certified Repair Station. With rigorous engineering, quality, and manufacturing, you can be assured that you are getting a high-performance oxygen system. Our customers include aircraft and helicopter OEMs, maintenance facilities, completion centers, EMS operators, and owner-operators. Our products include portable oxygen systems for general aviation users, PMA oxygen cylinders in Kevlar and Steel, Diluter Demand Oxygen Masks, and complete installed systems that include cylinders, lines, regulators, and masks.
